

## toolstar® shredderLX

The shredder software erases your data securely and irrevocably

- Self-booting, independent of the operating system
- Erase up to 4 media in Standard Edition\* at once
- Erases according to the most important German and international security standards, e.g. BSI, DoD, HMG
- Erases boot- and partitionsector viruses
- Firmware based erasing for SSD, NVMe, M2 etc.
- Audit-proof erasing-certificate for each individual disk
- Detailed system information and serial numbers in the report
- As a module in toolstar®testLX: testing, deleting and reporting in one operation

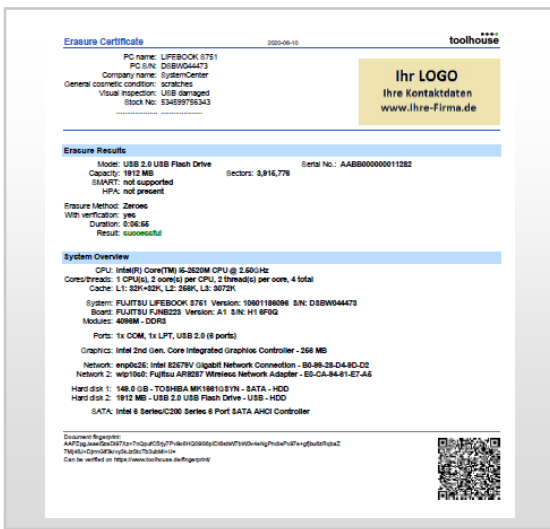

National Cyber Security Centre  
a part of GCHQ

Hard drive data must be better protected today than paper documents, as they can be evaluated and copied even more easily - this also applies to disposal. In addition, the legislature has also prescribed deletion in the Federal Data Protection Act since May 2001. toolstar®shredderLX offers you the option of deleting hard drive data securely, irretrievably and, above all, verifiably GDPR-compliant in accordance with international security standards.

toolstar®shredder guarantees data security when buying / selling used PCs and is important for everyone who wants to protect their own data and those of others:

- Administrators, PC dealers, service technicians, system houses ...
- Remarketers, processors and IT brokers ...
- IT managers, managing directors ...
- Lawyers, doctors, tax advisors, authorities....

### Security standards

- BSI Standard (Federal Office for Information Security, Germany)
- BSI VS-ITR, BSI-2011 (BSI, Germany)
